

Barrier Board™

Protection built in

Atlantic Coated Papers presents Barrier Board™ a flexible paper designed as a drop in replacement to traditional liners.

Barrier Board™ provides enhanced box strength and moisture resistance for even the most demanding applications.

Barrier Board™ allows the manufacture of boxes with maximum moisture, odour and grease protection.

Proprietary formula will not break down nor delaminate during the corrugation process.

Barrier Board™ has a clean smooth paper surface on both sides. Moisture barrier is sandwiched between two sheets of Kraft paper or liner.

Barrier Board™ allows for high quality colour printing. Can be used as the inside or outside wall of the box.

Barrier Board™ is fully Recyclable.
